

RE: DeLorme inReach SE

We are following FCC KDB 996369, Module Certification Guide and KDB 447498 General RF Exposure Guidance and have performed EMC and SAR testing on the device with the two transmitters operating simultaneously.

For reference the DeLorme inReach SE Bluetooth Module is certified under FCC ID: T7V1315, IC: 216Q-1315, and the Iridium Module is certified under FCC ID: Q639603, IC: 4629A-9603.

Thank you in advance for your assistance.
